

## Devonshire Group (*Recruitment*)

Devonshire is a leading recruiter of freelance, temporary and permanent creative people and providers of software training, outsourcing, facilities management, off shoring and specialist consultancy. Their people work around the clock, building and maintaining brand value whether design for print, presentations, interactive, on or off-line.

To support this diverse International organisation, Group Accountant in the London office, Tony Bolger, chose to implement Exchequer Enterprise Business software in January 2002 and can now execute volumes of intercompany transactions across the group instantaneously and keep tight control over all of their varied business activities.

***Tony chose the following solution for Devonshire (London):***

### **Exchequer Enterprise Accounting Solution – 8-user Multi-user Dual-Currency**

Financial Modules (Sales Ledger, Purchase Ledger, Nominal Ledger incl. Cashbook and Invoicing)

Report Writer, Paperless Module, OLE SavePack, ASCII Import Module, User-Defined Field Plug-in.

***And had this to say:***

*"Personalised and local service are both important to us; by being a smaller company, that invariably leads to the personalised service. Your knowledge of the product, and most importantly you and your staff are the key strengths. You are all comfortable with the product and make our staff equally comfortable whenever we need to talk on the phone. The changeover on this product was the least troublesome that I have ever come across."*

**Tony Bolger, The Devonshire Group**
