

H.Gaventa Limited

H. Gaventa (*Wholesale Jewellery*)

H.Gaventa are a London based wholesale jewellers supplying retailers such as Argos. Following years of mainly manual processes and systems, Exchequer Enterprise was selected to provide a level of automation to the long-established family run business.

An Oracle database had been developed to download the purchase orders from Argos's database and on a weekly basis the EDI invoices are created and processed, then uploaded onto the Argos database. This bespoke front-end system has been integrated with the accounting software so that detailed transaction analysis can be imported from Oracle to assist accountant, Les Moniz, manage the debtors ledger effectively and have the full use of the drill-down facility within Enterprise.

The requirements for a full multi-currency, COM compliant accounting software that has the level of functionality, flexibility and ease-of-use which are essential to Gaventa, lead Les Moniz to choose Exchequer Enterprise. To enhance the integration further and meet their needs as the organisation progresses, Stock Control, Bill of Materials and Order Processing can all be added to the core Enterprise solution to further improve operations at Gaventa.

David Gaventa, Managing Director and Les Moniz, Accountant for H.Gaventa chose the following solution for H.Gaventa in June 2002:

Exchequer Enterprise Accounting Solution – 4-user Multi-User Multi-Currency

Financial Modules (Sales Ledger, Purchase Ledger, Nominal Ledger incl. Cashbook and Invoicing), Report Writer, OLE SavePack and ASCII Import Module.

And had this to say:

"The staff at Whitegate came across as being approachable, likeable and people you could rely and trust. The size of Whitegate enables a good working relationship. The staff are friendly and helpful"

Les Moniz, Gaventa Ltd
